

NEWSBOT 2.0

Intelligent News Analysis System

Iffraah Rehman (W216165700)

NATURAL LANGUAGE PROCESSING (ITAI-
2373)

PROJECT OVERVIEW

- • Automated news analysis system
- • Uses NLP techniques
- • Generates insights and summaries

KEY FEATURES

- • Sentiment Analysis
- • Entity Recognition
- • Summarization
- • Multilingual Support
- • Conversational Interface

SYSTEM ARCHITECTURE

- Input → Processing → Analysis → Output
- Modular design
- Integrated components

USE CASES

- • Finance & markets
- • Political analysis
- • Media monitoring
- • Research insights

BUSINESS VALUE

- • Saves time
- • Reduces manual work
- • Improves decision-making

CONCLUSION

- • Integrated AI system
- • Scalable and flexible
- • Future: real-time data & advanced models
